

# What if you could view all your Verizon Business Internet routers from one centralized location?

Now you can with the Verizon Business Internet Portal. The Verizon Business Internet Portal allows Business Internet customers to monitor and manage their Verizon-branded routers via a single centralized location.

## Portal benefits

The Verizon Business Internet Portal offers:

- **Increased visibility:** Gain insights into device performance to promote better resource allocation and optimization
- **Flexibility:** As your business grows, router management can make it easier to scale your network and adapt to changing business needs
- **Simplicity:** An easy-to-use interface that allows you to quickly manage your Verizon-branded routers and view your third-party routers

## How can I access the Verizon Business Internet Portal?

The portal is available to all Verizon Business Internet customers with Verizon-branded or third party router. It can be found at [verizon.com/businessinternetportal](https://verizon.com/businessinternetportal).

## Verizon-branded routers

- Online/offline status
- Router reboot
- Run a speed test
- Wi-Fi settings
- View signal strength
- View connected devices
- Bulk management

## Portal support for third-party routers

The Verizon Business Internet Portal provides Business Internet customers with the ability to view information such as router identifiers, manufacturer information, and data usage for third-party routers.
